# Phizzle

Digital Air Series

The only software-defined solution to automate data capture and remotely operate air particle counters

First to Market

Phizzle's channel partners are industry leaders in network infrastructure and instrument qualification. Together, we are building the Digital Air ecosystem to bring modern software benefits to cleanroom environments — benefits like digital record keeping, e-signature, remote operations, and automation. No other partnership in the industry can offer this type of comprehensive digital transformation.

Innovation: First of its kind
Digital Air is the only software-defined solution to automate data capture and remotely operate air particle counters used GMP/ISO applications.

Value: Guaranteed ROI
Any GMP/ISO customer with multiple air particle counters in multiple locations is guaranteed operational cost savings.

Proof of Value: In Production
The same software: FDA-approved, in-production with one of the most important drugs in the world.

Brands We Work With:

Climet

Beckman Coulter

Lasair

AeroTrak

It's Easy

Digital Air is so easy to use, we asked our intern to show you how it's done

Scan to watch the unboxing & setup video

Step 1
Plug in the Gateway

Wait 2 Minutes

Step 2
Join the WiFi "Phizzle Gateway Setup"

Wait 30 Seconds

Step 3
Go to the Setup Portal

It's Battle Tested!

The Digital Air platform was built from Phizzle's years of experience in the pharmaceutical manufacturing space. Presently, this technology is deployed at a Fortune 100 Pharma company making several of the world's most important drugs. This is an FDA-approved, GMP-ready solution that has passed the highest-level audits in pharmaceutical manufacturing. Compliance, security, and traceability are all in the product's DNA. Phizzle already operates in mission-critical environments across the globe and can be trusted to integrate with your processes and requirements to whatever use case suits you.
